SUMMARY

I am passionate about web development with more than a year of experience as a freelance full stack Laravel developer. I seek an opportunity to apply my knowledge and skills in a full-stack development role.

SKILLS

PHP, Laravel, Unit Test, Restful APIs, RDB (MySQL, PostgreSQL), Browser Technologies (HTML, CSS, JavaScript, typescript, React JS), Git, Linux, Docker, and others.

Experience

Freelance, Egypt - Full stack developer

2023 - PRESENT

Achievements

- Building a real estate project to allow companies to attract brokers or estates owners to sell or rent their estates. Also to allow normal people to search for real estates that fit their needs.

- I worked for three months as part time in a company which gave me a role to write api unit tests in their e-commerce project, implement other tasks and fix bugs.

Skills: Html, Css, Js , Bootstrap, Laravel, livewire, FIlament, MySql, unit tests

Ecommerce Website - *[GitHub Repo](), [try online]()*

This project is made for helping people to buy any products online without the need to go to shops.

- I worked on the front end pages such as home page, Login Page, Register Page, Contact Us page, Shop page, Checkout page, Cart Page, Whilst page, Order history page, filament admin panel.
- I also added the payment integration for purchasing the products.

Skills: HTML, CSS, Alpine JS, Laravel, TailwindCss, MySQL, Docker, Paymob

Project Management - *[GitHub Repo](), [try online]()*

This full stack project was made for managing projects and tasks that were assigned to users .

- I worked on the front end pages such as the project page , tasks page, users page and for the backend i built the api for managing projects..
- I also add filtering, pagination and searching features for projects, tasks and users.

Skills: TailwindCss, Laravel, Docker, react 18, inertia, typescript.

Blog Website - *[GitHub Repo]()* - *[try online]()*

It allows people to manage their posts and share their thoughts to the public

- I worked on the pages of the project such as home, Login, Register, Edit, pages
- I also made the authentication and authorization process to make every person manage their posts.

Skills: Html, Css, Alpine JS, TailwindCss, Laravel , Postgresql, Docker

Game app - *[GitHub Repo]()* - *[Try Online]()*

This project was made for people who are interested in games and want to search for their preferred games and install it on their PCs.

- I worked on the front end of the project such as filtering games by genres, filtering games by platforms, color switch mode, and details page for specific game
- I also used the RAWG api to fetch the information of the games through Axios

Skills: chakra ui, react 18, typescript.

Authentication API - *[GitHub Repo]()* - *[try online]()*

This a full authentication api system to manage user's authentication process

- I made the register, login, logout, verify email, reset ,forgot ,confirm and update password APIs
- Also I used JWT for security purposes.

Skills: Laravel, Postman, unit testing, Docker
